# MimioMobile

Get the most out of the mobile devices you already have with the MimioMobile™ application. A single MimioMobile annual license for a teacher's classroom computer lets every student with a device interact with the lesson displayed on the interactive whiteboard.
The NEW MimioMobile 2 app lets multiple students simultaneously contribute to the learning environment. Teachers simply link the MimioMobile app to their MimioStudio™ classroom software, and the mobile devices can be used together, Apple or Android.

- Allows up to nine student devices to work simultaneously on a MimioStudio activity, with everyone's work displayed at the front of the classroom—encouraging collaboration.

- Use multiple device types at the same time: Apple and Android tablets and phones, MimioPad™ wireless pen tablets, and MimioVote™ assessment.

- Students can use their mobile devices for assessment via numeric, short-answer, and short-essay questions.

- Open-ended response questions help students practice for the upcoming Common Core Assessments.

- The MimioMobile app links with a simple point-and-click to the teacher's MimioStudio software. Just scan the QR code displayed on the whiteboard, and connect instantly.

- Purchase just one annual license for the teacher, and download the app to every student mobile device in the classroom.

mimio®
a better way to learn

Key Features

Minimum Software Requirements for Classroom Computer

- MimioStudio 11 software on Windows, Mac, or Linux OS.
- MimioMobile activation key, supplied upon purchase of the MimioMobile annual license, to enable functionality.
- For specific system requirements, please visit mimio.com/support/downloads.

Teacher and Student Modes

- MimioMobile app supports features for both teachers and students.

Teacher Control

- Allows teacher to control computer desktop.

Teacher Classroom Management

- Allows teacher to pass control to an active MimioPad tablet or mobile device running the MimioMobile application.
- Teacher can unilaterally retake control.

Student Response/Vote Support

- Allows students to participate in a student response/vote session.
- Students may use any combination of MimioVote handsets and mobile devices running the MimioMobile app.

Student Collaborative Tools

- Allows students to participate in a collaborative activity.
- Each individual collaboration space shown on the interactive whiteboard is replicated on the respective mobile device, so students don't need to look at the board.
- MimioStudio Collaborate feature works seamlessly with any mix of new MimioPad tablets and mobile devices running the MimioMobile app.

Ease and Security of Connection

- This patent-pending process turns the usually complex and time-consuming process of connecting multiple mobile devices into an instantaneous point-and-click. Just scan the QR code displayed on the whiteboard, and connect instantly.
- Connection is secure and minimal support is required.

Shortcut Keys

- Provides quick access to up to 16 commonly used MimioStudio Tools.
- Uses familiar MimioStudio icons, to shorten the learning curve for teachers and students.

Interoperability

- Works on Apple and Android mobile devices.
- The MimioMobile application can work simultaneously and seamlessly with the new MimioPad and MimioVote hardware.

Languages

- For a complete list of the languages supported, visit us at mimio.com/support/downloads.

System Requirements

- iPad 2, iPad 3, iPad 4
- iPad mini
- iPhone 4 and above
- iPod Touch (4th Generation and above).
- Android 3.0 (Honeycomb) or higher.
